

Ongoing research planning

It is impossible to design without having high quality information to work with- Fill this research plan in before you start initial designs and during the whole project at any time you need more information to make progress.

What do I need information about?	Why do I need it/ what will I do with it? What will be the benefit?	What form is the information in?	Where can I get it? (Primary, Secondary, Tertiary)	How and when can I get it?	Mission accomplished (date)
<p>User profile, needs and wants, aesthetic preferences. The market. Function and affordances. Anthropometrics. Critical dimensions. Ergonomics. Sustainability. Safety. Costing issues. Materials- availability, performance, working properties. Manufacturing- tools, equipment and machinery available . Personal skill levels. Anything unforeseen that arises during the project.</p>
